TRAILERS

# Product Range

McCauley Trailers Ltd manufactures high quality and durable tractor drawn trailers under the brand name MAC Trailers. These trailers are widely used in the farming and construction industries to transport machinery, equipment and aggregates.

All MAC trailers are built with brand new parts and meet all EU and exporting regulations.

## 2 Axle Low Loaders

MAC 2 Axle Low Loaders are manufactured in a range of carrying capacities from 7 tonnes gross to 18 tonnes gross. Recognised for their durability and robustness, these trailers are built with the desired strength to transport diggers and other cumbersome construction machinery with ease whilst providing a flexible and adaptable mode of transportation.

## 3 Axle Low Loaders

The MAC 3 Axle Low Loader is manufactured with a carrying capacity of 24 tonnes gross and has the capability to adapt to any industry. Like the 2 Axle Low Loaders, the trailer transports diggers and various types of cumbersome machinery with ease.

## Dump Trailers

The MAC Dump Trailer is regarded as one of the best on the market. Ranging in carrying capacities from 12 tonnes gross to 16 tonnes gross, these trailers are widely used by the farming and construction industries for easy movement of heavy debris, aggregates and landfill. With innovative design and engineering, MAC dumpers are lighter and more easily pulled than many of the models currently on the market.

## General Purpose Dump Trailers

MAC Trailers manufacture General Purpose Dump Trailers with carrying capacities of 9, 12, 14 and 16 tonnes gross. These trailers have a wide base and can be used for multiple applications including the movement of loose materials and the transportation of mini excavators.

## Half Pipe Tipping Trailers

MAC Half Pipe Tipping Trailers are available in 2 and 3 axle configurations and range in carrying capacities from 20 tonnes gross to 30 tonnes gross. These rear tipping trailers come complete with 10 stud commercial axles and a front tipping cylinder for ease of unloading. Available in Hardox Steel.

## Flatbed Trailers

MAC Flatbed Trailers are used by farmers and agricultural contractors for the efficient transportation of bales and potatoes. These trailers can adapt to most operations with ease and are available in carrying capacities of 18 tonnes and 24 tonnes gross.

## Grain / Silage Trailers

MAC Grain & Silage Trailers range from 12 tonnes gross to 18 tonnes. These trailers are designed and manufactured to an exceptionally high specification to handle the demands of harvesting. A well engineered chassis ensures durability and strength whilst the innovative design provides users with an appealing alternative to many models currently on the market. Silage sides can also be added for those needing extra capacity.

## Export Trailers

MAC Trailers have developed a range of Turntable Trailers specifically for the European market. Available in 2, 3 and 4 axle configurations, these trailers come in both Flatbed and Low Loader variations and range in carrying capacities from 18 tonnes to 30 tonnes gross.

## Custom Builds

The extensive range of agricultural trailers we have is just part of what we offer our customers. With our in-house design team we specialise in the customisation of trailers to suit individual requirements and work closely with our customers to supply the exact trailer you may require.
